An IT graduate with a passion for transforming ideas into sleek, user-friendly digital experiences. Specializing in Flutter and asp.net core development, I thrive on building cross-platform mobile apps and responsive web interfaces that blend functionality with aesthetic appeal. With a strong foundation in software development and a knack for UI/UX design, I deliver solutions that are both technically robust and visually engaging. My goal is to craft seamless user experiences that make a lasting impact.

Relevant Experience

Mobile Service Ordering App | Graduation Project (Top Care Company) — Apr 2023 – Jan 2024

- Designed and built a scalable mobile and web solution from concept to deployment to replace Top Care Company's legacy service ordering process.
- Architected and developed the front-end for both customer-facing (Flutter/Dart) and administrative (Flutter Web) interfaces, ensuring a consistent user experience.
- Designed and integrated the cloud back-end utilizing Firebase services (Firestore, Authentication) to handle real-time data synchronization and user security.
- Built the complete order lifecycle logic, including creation, real-time status updates, modifications, and cancellations, directly within the application.
- Followed an agile development cycle, incorporating stakeholder feedback to iterate on features and ensure the final product met business requirements.

School Management System | Personal Project — Dec 2024 – Feb 2025

- Engineered a robust, full-stack web application using ASP.NET Core Web API and SQL Server with Entity Framework Core to centralize all school administration functions.
- Secured the system by designing and implementing role-based portals (Admin, Teacher, Student, SuperAdmin, Finance) featuring JWT authentication, ensuring data integrity and authorization across different user tiers.
- Improved operational efficiency by implementing real-time grade calculations and automated enrollment workflows, engineered automated enrollment workflows, reducing administrative processing time by an estimated 40%.

Eitmed for Finance — Dec 2025 – Current

Finance Systems Developer & Technical Support Officer

- Served as a junior developer and support specialist for the company's core finance platform, bridging technical execution with end-user needs.
- Developed and enhanced system features, contributing to code improvements that increased operational efficiency and accuracy for daily financial processes.
- Acted as a technical support contact, diagnosing and resolving system issues for users and coordinating solutions with technical teams to ensure system stability.
- Collaborated directly with clients and internal stakeholders in requirement-gathering meetings, translating business needs into actionable technical documentation and development tasks.
- Played a role in the software development lifecycle by rigorously testing new features and system updates prior to deployment to ensure they met specifications.

Additional Projects

Real-Time Chat App, Activity Finder Web App, and more available on GitHub.

Education

BSc in Information Technology – The Future University,
Sudan (2018 – 2024)

Full-Stack Bootcamp (ASP.NET Core MVC) – Coderz for Software & Training,
Amman, Jordan (Completed 160hrs)

Certifications

AWS Certified Cloud Practitioner (CLF-C02) | Amazon Web Services (AWS).

2026

Technical Skills

Languages & Frameworks: C#, ASP.NET Core, Flutter, Dart, JavaScript

Cloud Infrastructure: AWS (EC2, S3, RDS, Lambda, IAM, VPC) Cloud Concepts, Architecture Basics

Databases: SQL Server, Firebase Firestore

Frontend: HTML, CSS, Bootstrap

Tools: Git/GitHub, Visual Studio, Android Studio, Docker

Soft Skills

Problem-Solving • Adaptability • Communication • Project Management • Technical Troubleshooting

Languages:

Arabic: Native

English: Professional

Chinese (Mandarin): Intermediate
